MEMORANDUM

SUBJECT: Final Decision for No Corrective Action
Safety-Kleen Systems, Incorporated
9317 Woodend Road
Edwardsville, Kansas 66111
EPA ID No. KSD980973515

FROM: Kurt Limesand, AWMD/RCAP

TO: Lynn Slugantz, Branch Chief
AWMD/RCAP

By memorandum dated August 24, 2011, the U.S. Environmental Protection Agency Region 7 had proposed no further corrective action activities at this time for the former Safety-Kleen Systems, Incorporated facility in Edwardsville, Kansas based on the information in files maintained at EPA and at the Kansas Department of Health and Environment (KDHE).

As outlined in the August 24 memorandum, the facility initially made notification in 1985 as a treatment and storage facility, and later was permitted for generation, storage, and transportation of hazardous wastes from 1990 to 2000. This facility was primarily a collection and distribution center for waste and regenerated solvents, respectively.

The RCRA permit expired in October 2000, and the facility underwent closure under KDHE oversight. Rinsate samples were collected to assess the effectiveness of facility decontamination efforts, and soil confirmation samples were collected to assess the potential for contamination beneath waste and product management units. Soil sample analytical results were either below residential soil exposure screening goals or were attributed to natural background conditions at the site. KDHE accepted the facility closure certification on February 4, 2002. The physical address is now occupied by a landscaping business that has not made notification as a generator of hazardous wastes.

Our proposed decision to require no further corrective action activities at this time was offered for public comment from August 29, 2011 to September 28, 2011, commencing with the August 29, 2011 public notice placed in the Kansas City Star daily newspaper. Administrative files were offered to the public for review. No comments were received during the comment period. EPA is hereby finalizing the decision for no further corrective action at this time for the Safety-Kleen Systems, Incorporated facility in Edwardsville, Kansas.
